

# SEIRfansy predicted $R(t)$ across scenarios

Moderate PHI   Strengthened PHI   Moderate lockdown - March 19   Moderate lockdown - March 30   Moderate lockdown - April 15

**Notes:** Points are plotted at the end of range used to estimate  $\beta$ .  
Moderate lockdown beginning March 19 is solid purple, March 30 is dashed purple, and April 14 is dotted.  
Vertical lines indicate the start of the prediction period.
